PulseFX

PulseFX Hedging Solutions

Control Your Currency Risk

Introduction

Remove uncertainty from FX fluctuations. PulseFX offers powerful hedging tools—limit orders, forward contracts, and options—to lock-in rates, manage future exposures, and protect your margins.

Core Benefits

- Rate **Certainty & Cash Flow** Planning
  Know today's costs, even for future transactions.
- Flexible Protection **Strategies**
  Hedge downside while keeping upside potential.
- **No Surprises,** No Jargon
  Simple execution through expert support.

Hedging Tools

1 Limit Orders

- Set & forget: Pre-define a target rate and let PulseFX execute your trade automatically when it's met.
- Ideal for businesses waiting for favorable currency levels.

2 Forward Contracts

- Lock in rates today for future needs—up to 5 years out.
- Ideal for budgeting known future receivables/payables (e.g., supplier invoices or client billing).

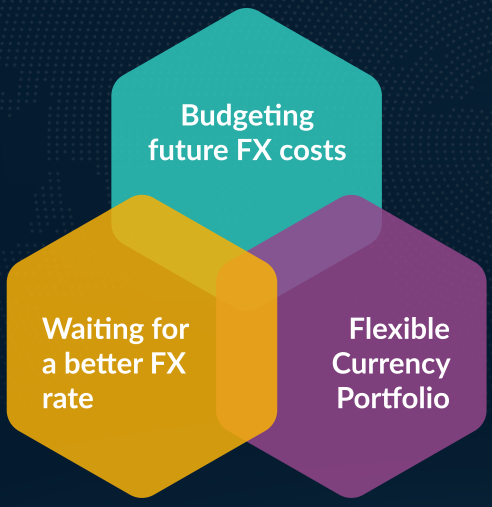

3 Options Contracts

- Protect downside, keep upside
  Ideal when facing market uncertainty or sensitive profit margins.
- Customizable terms to suit your strategy.

Zero-Margin Facility

Access hedging tools without posting collateral—enhance capital efficiency and flexibility.
With good-standing company financials, clients may be eligible for zero-margin access.

Use Cases

- Forward Contracts
- Limit Orders
- Options Contracts

Why PulseFX for Hedging

- **Tailored Terms:** Lock-in rates for up to 5 years
- **Expert-Led Strategy:** Dedicated advisors guide every trade
- **Secure Execution:** Transparent, compliant, and fast

Client Story

Switching to PulseFX has been one of the smartest moves I've made. Their rates are far better, transactions are quicker, and the platform is intuitive. I routinely save hundreds—and sometimes even thousands—on each transfer.
